

Meet the QTEC Team

Chub Horvath

General Manager

How and when did you first commence work with QTEC?

I started with QTEC last February 2021. I am very excited about the quality and benefits of our products and their benefits for customers.

Tell us about your industry and background?

I started my career in Europe as a printing machinist and after getting my bachelor's degree in Economics Engineering, I worked in printing and packaging for large multinational companies selling their products and services while providing technical support as well. Then, I worked in the textile-rental services business and built-up daughter companies from scratch for Europe's largest textile-rental services provider in three different countries (Hungary, Germany, Turkey). I continued my career in the same industry in Australia after arriving here in 2015. Before Qtec, I worked for a German company selling their capital equipment into the woodworking industry and managing their state operations in Queensland.

What are your current role and deliverables?

I am the General Manager of QTEC and responsible for all operational and financial results.

What do you find most exciting about working for QTEC?

I see a very good future for the company's products and services. Also, I identify myself with the values of United Safety & Survivability. I like very much how I was welcomed here by my colleagues.

What do you enjoy about your role and what is the most challenging part of your role?

I am very excited to contribute to the future growth of the company.

What do you enjoy in your spare time?

I like to explore new places in Australia. My wife and myself find beautiful places to visit. We also very much like to spend as much time outdoors as possible and go almost every weekend to do beach walks as well.

If you were down to your last \$10 what would you spend it on?

I would spend it on some online tuition to further improve my knowledge hoping that I will be able to make money quickly.
