

Meet the QTEC Team

Tim Whitworth

Store Person

How and when did you first commence work with QTEC?

I saw an advert on Seek and decided it might be a step upward from my current role at United Safety which I thoroughly enjoy.

I will start my role with QTEC in early July, something I am looking forward to being challenged by.

Tell us about your industry and background?

Most of my experience revolves around more than 25 years in logistics and warehousing at every level, from storeman to manager. I have worked in industries including Agricultural Machinery, Footwear Manufacture, Heavy Transport Machinery, Height Safety Equipment Manufacture and LED Lighting.

What is your current role and deliverables?

I am the workshop technician for United Safety, where I predominantly build slave and single cylinder

fire suppression systems for the Public Transport Authority's bus fleet.

What do you enjoy doing in your spare time?

I have a small music studio where I play, record and manipulate electronic music with keyboards, drum machines and computers. I also enjoy the company of craft beer.

If you were down to your last \$10, what would you spend it on?

I would buy 20 shares in Paladin Energy or more than likely "lend" it to my daughter.
